

FlightScope X3

Selling Price: \$13,000 cdn.

Used one season indoors at the Lethbridge Country Club's fitting studio. LIKE NEW, unit worked great but recently purchased Foresight GC Quad.

Flightscope's X3 is an innovative combination of 3D Doppler tracking radar and synchronized image processing for unmatched data accuracy. The X3 is a full tracking radar and will track the golf ball from impact to landing.

The Flightscope X3 is a launch monitor and simulator that uses patented Flightscope fusion tracking technology to provide golfers, instructors, and club fitters with accurate golf performance data. Fusion tracking technology is an innovative combination of 3D doppler tracking radar technology and synchronized high speed image processing that helps provide users with the most accurate and consistent data for every shot - indoors and outdoors

Flightscope X3 Features:

- 50 Data parameters
- 10 E6 Connect Simulated Golf Courses (iOS and PC)
- Full tracking radar: Tracks the ball from impact to landing
- Patented environmental optimizer feature
- Auto-leveling feet for easy set up
- Battery life up to 6 hours
